

In-line automatic filler

Filler for all liquid products
Filling range from 50 ml to 30 litres

- ▶ Upgradable filling machine according to speed requirements (from 2 to 10 heads)
- ▶ Flowmeter dosing technology: volumetric, mass or magnetic
- ▶ Quick format changeover without tools
- ▶ Dosing accuracy and easy maintenance
- ▶ Automate controlled - 6" touch screen
- ▶ Flexible with a filling range from 50 ml to 30 l on the same machine

Food

Chemical-Detergent

Pharma-Cosmetic

Features

Flowmeter dosing technology assures flexibility of use from 50 ml up to 30 litres in standard conception.

For optimal packaging, we master three types of flowmeters depending on nature of product to fill.

All our filling machines are equipped with buffer tank to ensure better dosing quality.

We offer a variety of options and finishing to best meet your production specifications represented by our two models of in-line automatic filling machines:

► Standard automatic filler

- Upgradable from 2 to 6 filling heads
- Automate controlled - 6" touch screen

► Premium automatic filler

- Upgradable from 2 to 10 filling heads
- Industrial computer controlled - 10" touch screen
- Machine cleaning-in-place
- Statistical production data by usb key

Options

- Pharma-Cosmetic finishing
- ATEX certified conception
- Stainless steel compatible version for corrosive products

The different flowmeters

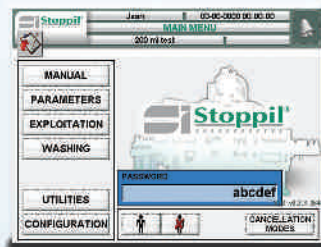

Volumetric flowmeter
Accuracy +/- 0.5 %

Electromagnetic flowmeter
Accuracy +/- 0.3 %

Mass flowmeter
Accuracy +/- 0.2 %
